An Emerging Concept:

Integrated Health Care Systems

As a health care attorney and office manager for 13 years, I value Praxis' in-office, insurance carrier and billing experiences, which relieves physicians of their administrative responsibilities and empowers them to focus on patient care.

Linda C. "Fritz" McKenzie, Esq.
Consultant/Marketing Director

The national focus on health care reform will force physicians to decrease cost and increase efficiency.

Praxis offers the solution. Our "clinic without walls" concept provides more than the *traditional* billing package.

It includes:

- Reduced staff turnover and training
- Increased cash collections
- Immediate follow-up on insurance claim appeals
- Updates in coding and government regulation changes, and
- Graphical management reports for better decision making.

And by developing a physician information network, Praxis can help physicians maintain their influence in the health care industry, control costs and increase the quality of patient care.

For more information about our services, contact us at 941-3363.
